

There's no such thing as impossible

## Card Stacker Series 910

The secure and reliable Card Stacker 910 from ddm hopt+schuler does a great job of dispensing ISO 7810-compliant plastic cards. It provides room for 250 cards in its stack, and this can be optionally reduced or expanded. Cards are dispensed by means of a claw mechanism powered by a strong geared motor. Optional: acceptance of cards from outside for the processing of smart cards and/or contactless cards or for space-saving storage within the device.

### Details at a glance:

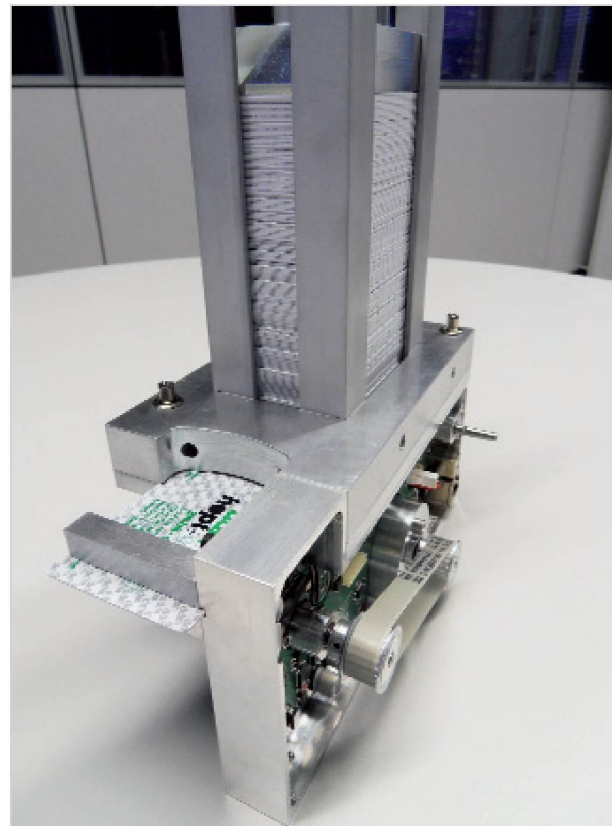

#### Ticket Dispenser

- Customisable configuration
- 24 V power supply
- Interfaces: RS-232, USB, or Ethernet

#### Optional:

- Contactless cards conforming to ISO 14443
- Smart cards conforming to ISO 7816
- Can be combined with other ddm devices
