

REACH Certificate of Conformity

Registration, Evaluation, Authorisation and restriction of Chemicals (REACH)

European Directive EC 1907/2006 (REACH) came into force “1st June 2007” to identify and manage Chemicals and Products containing SVHC’s (Substances of Very High Concern) hazardous to health.

The candidate list of substances of very high concern (SVHC’s) for authorisation now **contains 201 substances**.

SVHC’s substances are within the limits of 0.1%

DAU Components Ltd classifies all products (unless otherwise stated) as being REACH Compliant based on the information provided by our manufacturing partner’s.

- The Supplier has confirmed compliance status with the above directives.
- The product does not contain any of the restricted substances at concentrations in excess of those permitted by the directive.

DAU Components Ltd does not perform any in-house testing on incoming materials to determine presence or absence of the banned substances. We make no warranty with regards to the accuracy of the information provided.
